 **START GAME**

Options

ELEVATOR PITCH

- Turn-based roguelike TCG game with a dark fantasy medieval aesthetic
- you play as a fallen knight who is trying to get revenge for himself and his wife
- The progression system is based on boss fights, for which you get loot cards you can choose from to build your character

DESCRIPTION

- Game made to enrich turn-based gameplay through engaging mechanics
- You play as edrick, an outlaw who was a knight once
- Each run will start at a forest near the castle
- The player must fight enemies and bosses in floors to finish the game

ROUGUE LIKE ELEMENT

Run reset

After the player is defeated, they will have to start the game again, since the forest

Randomized enemies

Each room will have random enemies selected out of a pool of enemies in each floor making each run unique

Progression across runs

After losing in a run, the player will be able to keep one card obtained from the bosses throughout the game

Trial and error

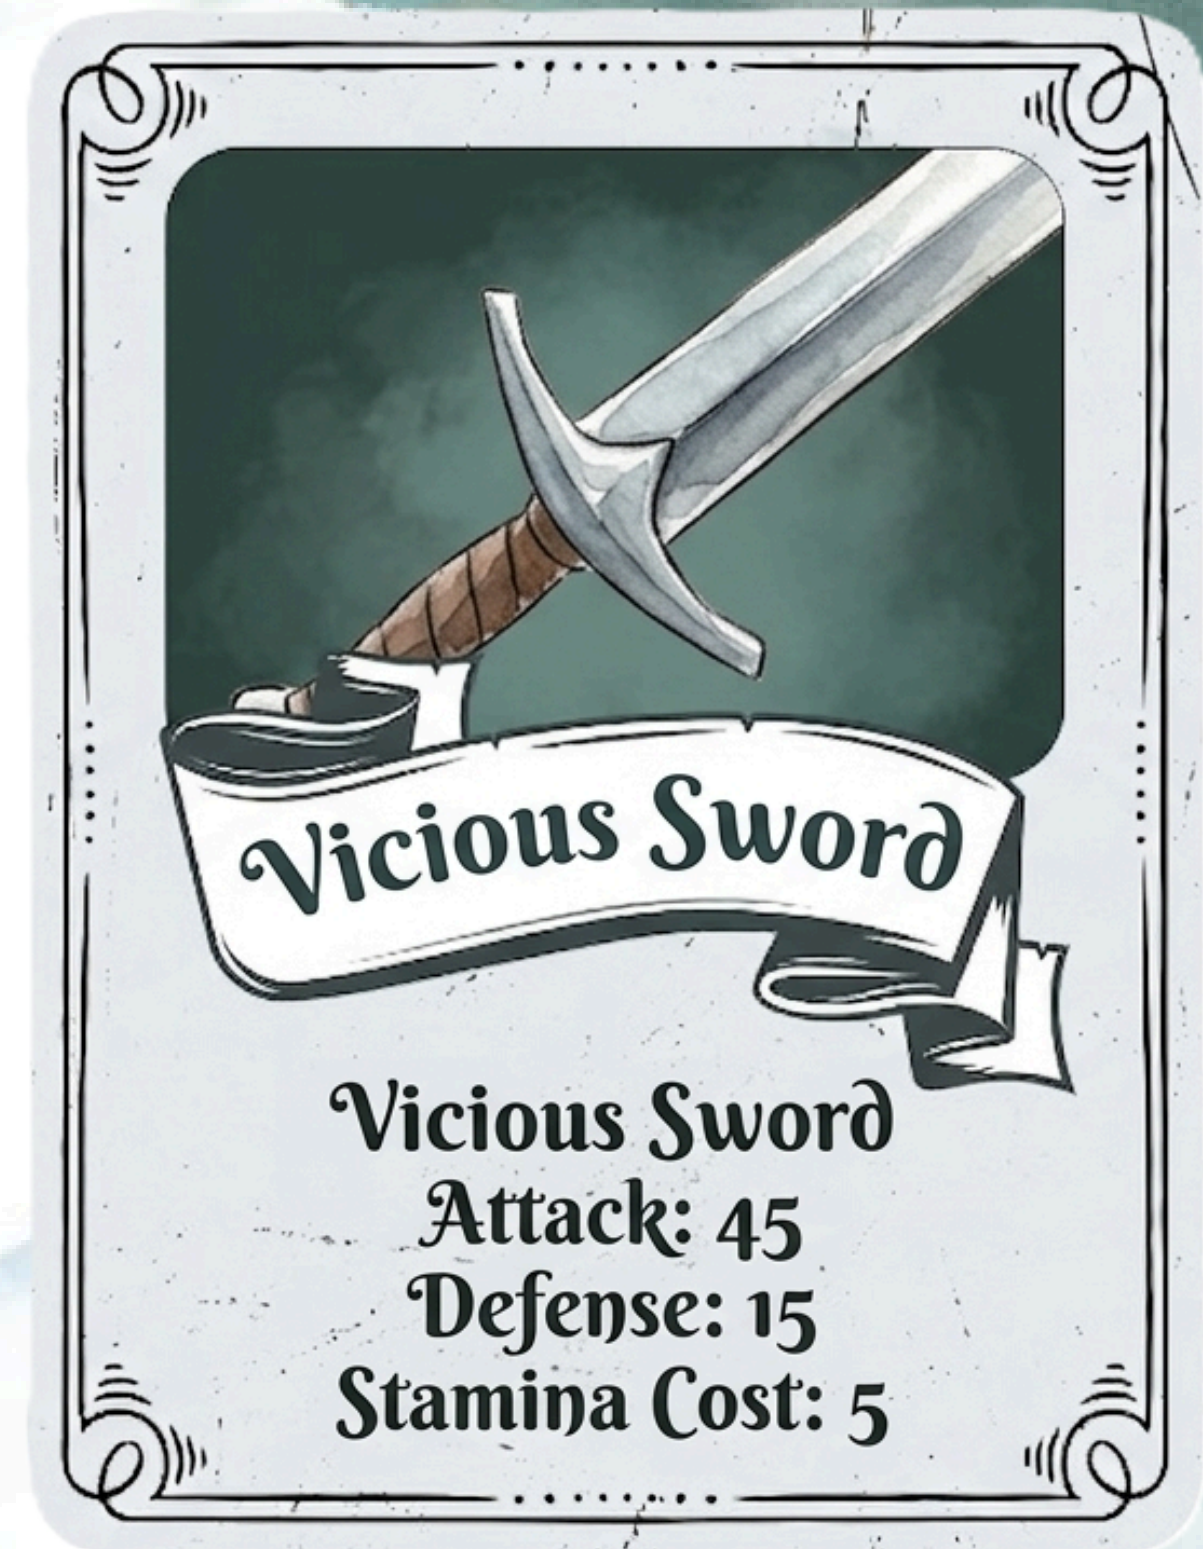

Players will have to try different strategies like different builds to get better at the game

TCG ELEMENTS

Players select up to 5 cards (attack, defend, spell) per battle and manage stamina costs.

Each card has different stats and attribute requirements

In every turn, the player will select one item card, one action, and one enemy (if an attack was chosen)

FLOOR PROGRESSION

- After clicking play, the player will be taken to a map screen for room and floor selection.
- The player will have to complete one room before advancing to the next one
- Each run will start in a forest right outside the castle, where the mechanics will be explained
- Before entering a room, a selection menu will display, and the player will select 5 cards to use in that battle

MECHANICS

ITEM CARDS

After each battle, the enemies will drop loot in the form of item cards. This will be saved on the player's inventory, but the player will be allowed to use only 5 cards per battle, the cards have specific stats and requirements that will scale with the player's attributes

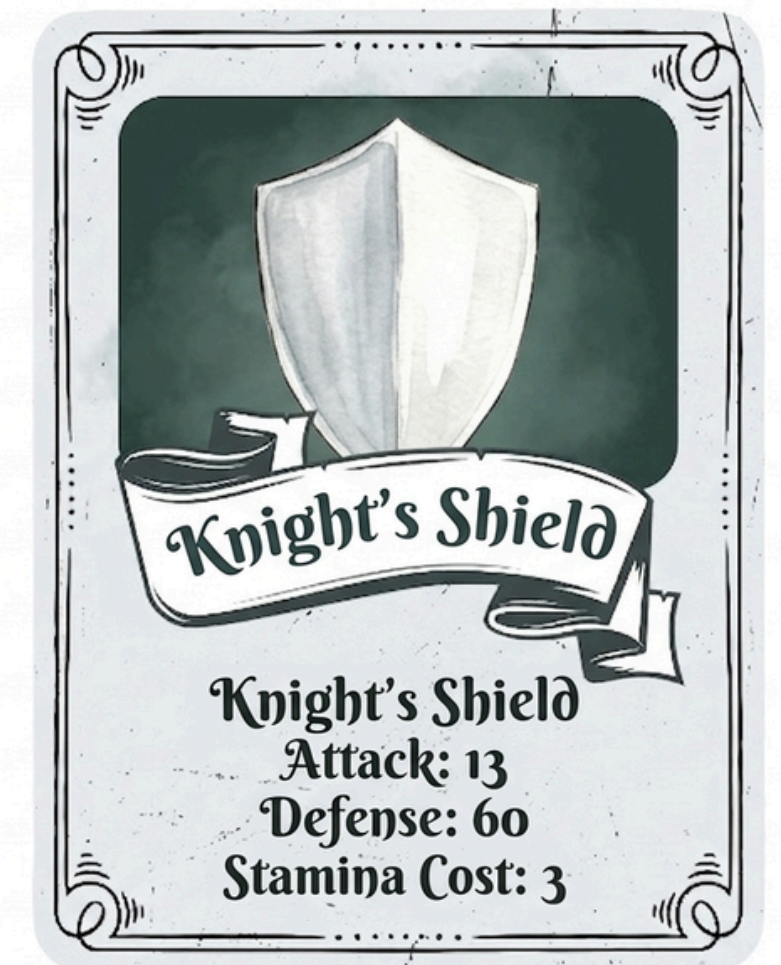

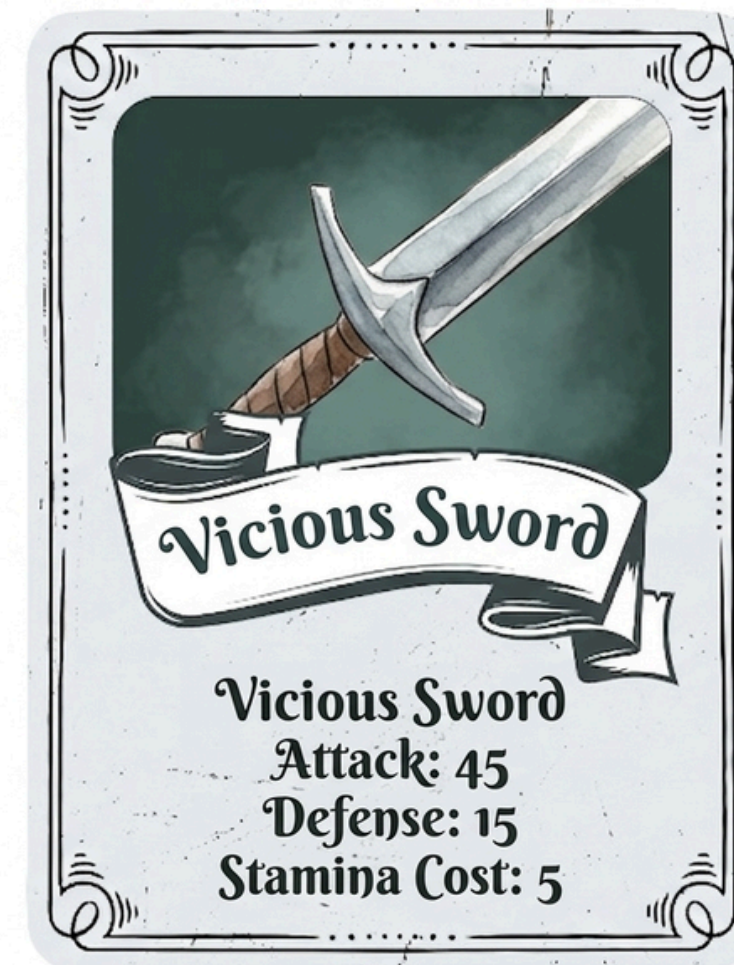

PARRY

A real-time timing bar dictates defense: Perfect: Zero health loss and moderate stamina gain. Normal: Small health loss and small stamina gain. Poor: Large loss of both health and stamina

ATTRIBUTE PROGRESSION

After each battle, the player will receive experience points that will be exchanged for attribute points (Strength, Vigor, Intelligence, Endurance, and Dexterity). This will change aspects of the gameplay like the amount of health and stamina points or the stats of a weapon

STATISTICS

- **Progress:** Current floor reached, and specific enemies/bosses defeated.
- **Performance:** Success rates of perfect vs. poor parries to track player mastery.
- **Character Data:** Experience points, attribute levels, and the collection of permanent loot cards.
- **Completion time average:** Mean time players took to finish the game.

A watercolor illustration of a mountain landscape. In the foreground, several dark green evergreen trees are visible. The middle ground shows rolling hills and mountains partially covered in mist or low clouds. The background features more distant, lighter-colored mountain peaks. The sky is a mix of light blue and white, with soft, wispy clouds. Several birds are depicted in flight, scattered across the sky. The overall style is soft and painterly, with a cool color palette dominated by blues, greens, and whites.

THANK YOU
